LECTOR KID 6

The perfect Hardtail for the next generation of racers! Too often, juniors have to make do with poorly suited frames and compromise solutions. With our LECTOR they now have their own carbon hardtail with racing ambitions, designed specifically for them. The adult LECTOR is one of the most popular, lightest and fastest bikes around! The featured 26 inch wheels can be replaced with 27.5 inch wheels at a later time, not only extending the kid-suitable life of the bike, but also greatly expanding its versatility.
